

Perform-A-Deck® & Series 300®

Fully Warranted Complete Metal Roof and Deck Assembly

The **Perform-A-Deck** and **Series 300** metal roof and deck assembly sets the standard for the hurricane and tornado enhanced roofing envelope.

The system is engineered and tested to resist extreme winds and debris impact, as defined by the *FEMA 361 Design and Construction Guidance for Community Safe Rooms* for resistance to wind uplift and impact from wind-borne debris.

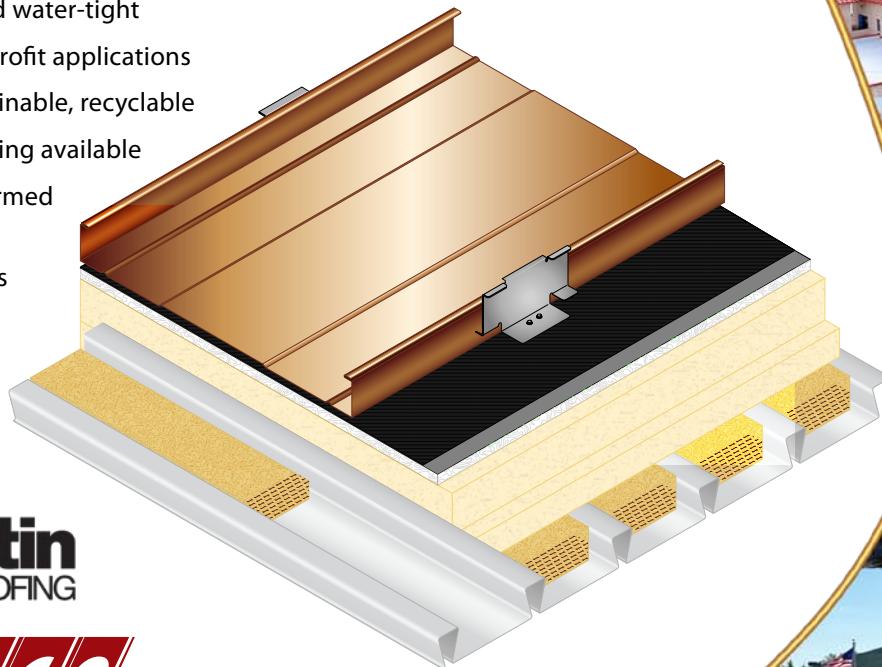

- Withstands wind speeds of more than 220 mph
- Withstands wind uplift pressure up to 550 psf
- Meets FEMA 361 missile impact requirements
- Impervious to water infiltration

The **Perform-A-Deck** roof deck system from Martin Fireproofing offers:

- Outstanding structural strength
- Maximum energy efficiency
- Optimum acoustical values
- Excellent waterproofing protection
- UL Fire-rated design

Timeless elegance, proven performance, strength & versatility make **IMETCO's Series 300 Symmetrical Seam Metal Roofing** the system of choice.

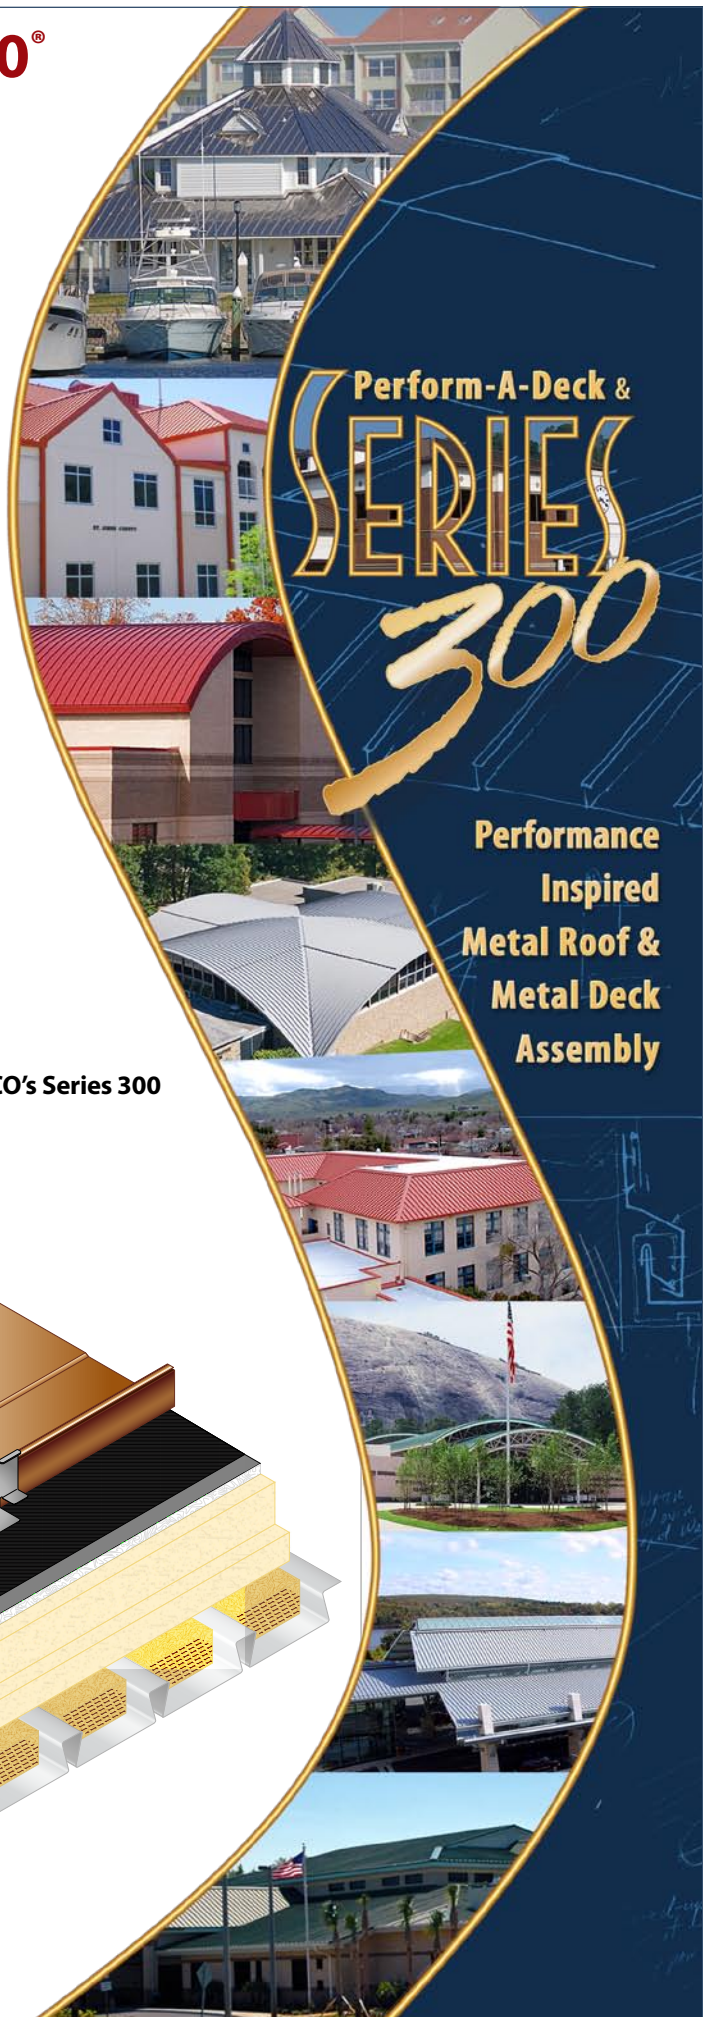

- Fully tested and warranted
- Wind-resistant and water-tight
- Ideal for new & retrofit applications
- Eco-friendly, sustainable, recyclable
- Curving and tapering available
- Factory or field-formed
- Wide variety of materials & gauges
