

SNAP-LOK

Snap-Lok™ standing seam metal roofing from IMETCO is a high-performance architectural system designed for improved resistance to wind uplift and water infiltration.

Snap-Lok features 1¾-inch interlocking seams with concealed clips and factory-applied sealant, which allows unlimited thermal movement and maintains structural integrity.

The Snap-Lok system is manufactured to IMETCO's legendary standard of quality and service.

Design Characteristics

- 1¾-inch interlocking seam
- Excellent wind uplift resistance
- Simple one step installation
- Heavy duty 18-gauge concealed clips
- **Unlimited thermal movement**
- Factory-applied seam sealant, completely isolated from clips
- Available in 10-, 12-, 16-, and 18-inch widths
- Panel striations standard
- Can be installed over open purlins with slopes greater than 3:12
- Can be installed over solid substrate with slopes as little as 1½:12
- Available in a wide variety of materials and colors

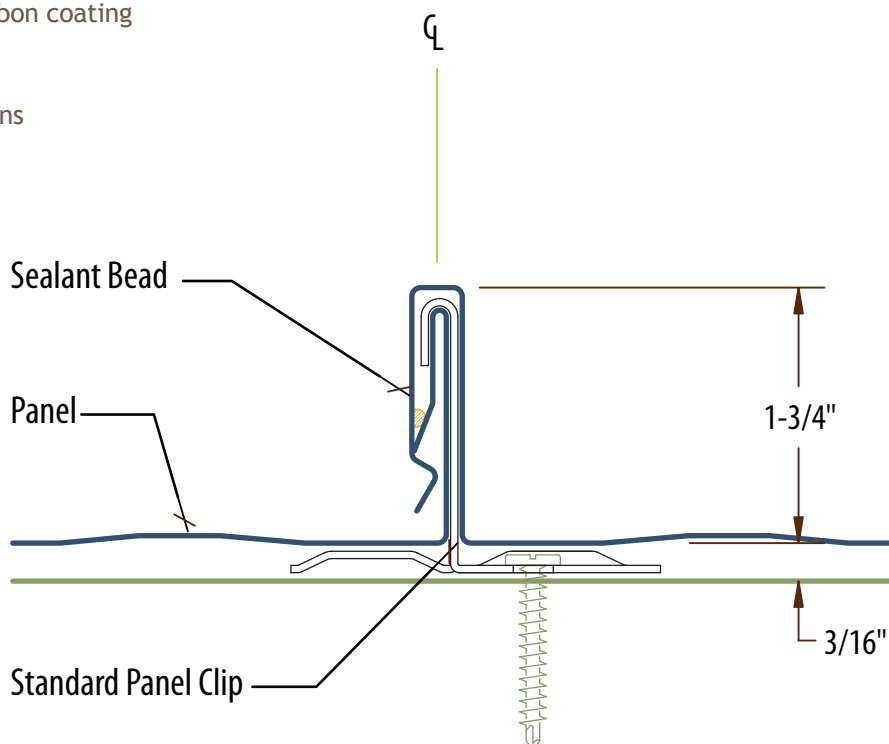

Warranties*

- 20-year finish warranty for Kynar® fluorocarbon coating
- Materials and workmanship warranty
- Watertight warranty on qualifying applications

* Sample warranties available upon request

Testing

- ASTM E-1592 uniform static air pressure
- ASTM E-1680 air infiltration
- ASTM E-1646 water infiltration
- UL 580 (Class 90) windstorm rating
- UL 790 (Class A) fire resistance
