

SP SERIES

METAL SOFFIT PANELS

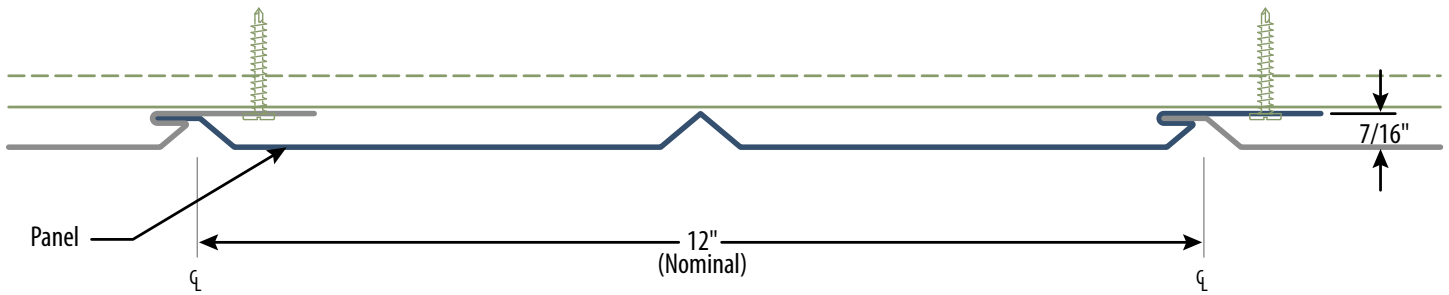

SP Series metal soffit panels offer a low-maintenance, highly-reliable, concealed fastener system for decades of beauty and durability.

Suitable for commercial and residential applications, this durable system combines aesthetic appeal with the quality assurance of IMETCO metal products in an easy-to-install soffit system.

SP Series panels are factory fabricated to IMETCO's legendary standard of quality, and backed by unparalleled service and support.

Design Characteristics

- Available in lengths up to 12 ft.
- Can be vented to allow air circulation and under-eave ventilation
- Attached with concealed fasteners at maximum 24 inches on center
- Install left to right over furring channels spaced at 2-ft. o.c. maximum, or over solid substrate

Available Materials

- .032 aluminum in IMETCO's standard colors
- Panels also available in .025 aluminum in Regal White

Warranties

- 20-year finish warranty
